

Daily Speed Data

This is the daily speed data for E. Braker Lane in Whisper Valley. A couple of points to note when interpreting the data:

1. Speed data from 6/28 through 7/5 is for eastbound traffic between Adoro and Taylor lane (actual direction is roughly SSE).
2. Speed data from 7/6 through 7/11 is for westbound traffic at Whisper Willow Blvd. (actual direction is roughly NNW).
 - a. Vehicles turning onto E. Braker from Lighthearted headed westbound have to accelerate uphill, which will reduce average speeds.
 - b. the distance between Lighthearted and the measurement device is approximately 940ft, although the device will begin measuring vehicle after it has accelerated for about 700ft or so, also tending to reduce the average speed of these vehicles.
3. Data points below 30mph were omitted to rule out bicycle and e-bicycle traffic.
